Acceptable File Formats

PDFs are strongly encouraged. Hi-res Illustrator EPS files are also accepted. Ads requiring work to be done by us will incur an additional charge. Ad materials are stored for one year and then deleted.

Preparing native files for printable PDFs

Multiple pages need to be submitted as single page files. Artwork must be CMYK, minimum 300 dpi. Files must be flattened (no layers or transparencies). Set bleeds 1/8" beyond trim. DO NOT use stylized fonts. Embed all fonts. Overall density of CMYK colors cannot exceed 300%. Set trim marks with a 12-point offset so the marks don't overlap the bleed.

Submitting Digital Files

Use file names that include the magazine title, issue date, and project name. Ads can be submitted via FTP, a file-sharing service such as Dropbox, or an email to the Production Coordinator.

Uploading to FTP

It's important that the file is placed in the proper directory. All uploads should be followed by a confirmation phone call or email to the Production Coordinator.

FileZilla Instructions

1. To install, go to <https://filezilla-project.org> and click on Download FileZilla Client.
2. Open FileZilla and enter Host, User Name, Password, and Port 21.
3. Click on the Quick Connect button at upper right.
4. In the Local Site window on the left, locate and click on the source folder containing the file to be uploaded. Your file will appear in the Filename window below.
5. In the window on the right, click on the 1105external folder, click on the production folder, and locate the folder for the magazine.
6. Select your file in the Filename window on the left, and drag it to the magazine folder on the right.

Proofs

If a proof is provided, it must be a SWOP proof created from the supplied digital file. A laserprint is not SWOP-quality and is not color-accurate. If a SWOP proof is not supplied, we are not responsible for variances between the digital file and final reproduction. Send proofs to:

Webinars

Your Powerful Tool for Generating Quality Sales Leads

Budget constraints and increasingly hectic work schedules can often prohibit today's health and safety decision makers from physically attending seminars, conferences and expositions. Instead, it is important that today's health and safety product and service vendors seek innovative and cost-effective ways to disseminate information and engage prospects and clients in a timely manner to spotlight new technologies, product launches, strategic partnerships and more.

That's why *Occupational Health & Safety* offers a turnkey webinar solution that allows health & safety products marketers to tap into our expertise and expansive market reach and drive valuable customer leads.

Vendor Webinars

The unique presentation of a webinar forum allows clients to deliver information and engage participants in a timely, cost-effective manner. Whether at home or on the road, participants can view presentations through their web browsers while simultaneously listening to the audio. Discussions can take place in real time, and your audience of health and safety buyers are encouraged to ask presenters questions. You provide the speaker, the topic, and the presentation and collect all the leads.

Editorial Webinars

In addition to single-sponsored customer-supplied webinars, *OH&S* offers the opportunity for companies to co-sponsor time-sensitive editorial topical webinars. This variation of the popular webinar medium allows a company to sponsor for a fraction of the cost of a sole-sponsored webinar. Plus, the webinar is promoted in the very same fashion as a sole-sponsored webinar.

Sponsorship

- Registration development and collection
- Comprehensive event promotion on our websites and through social media
- Logo and sponsorship acknowledged in promotions to 65,000* targeted *OH&S* eNews subscribers
